

Pressure Microblasting Equipment MICROPEEN 250

The pressure microblasting system for all microblasting equipments PEENMATIC.

MICROPEEN 250 is a small pressure microblasting equipment for accurately targeted microblasting. It is used for cleaning, deburring, roughening, densification, polishing etc.

MICROPEEN 250 only requires to be connected with the compressed-air network of the microblasting equipment PEENMATIC. The flexible microblasting agent tube is inserted simply into the microblasting cabin. The microblasting on / off function is made by the pneumatic foot actuated switch.

MICROPEEN 250 is installed, optionally, with a console at the side (laterally) at operation level of the microblasting equipment PEENMATIC.

Technical data:

- | | |
|-------------------------------|---------------------------------------|
| - Container system | width 265 x depth 285 x height 350 mm |
| - Quantity of container | 1,7 litre |
| - Foot actuated switch | pneumatic |
| - Pressure control | 0 - 8,5 bar |
| - Manometer | 0 - 10 bar |
| - Hard metal blasting nozzles | Ø 1,2 and Ø 1,8 mm |

All data are given without liability on our part. We reserve the right to modify constructional design at any time.
